

Drive the Lean Road to Increasing Profits

RACC's Schmidt Training and Technology Center is Offering a
Lean-Six Yellow Belt Workshop in May 2019

1. Introduction to Lean Principles – Thursday, May 2

You will understand the Eight Wastes inherent to any process and be able to identify and eliminate them. You will also learn the principles, strategies and techniques required for a successful Lean deployment.

2. DMAIC (Define-Measure-Analyze-Improve-Control) – Thursday, May 9

You will understand the Lean Six Sigma DMAIC data-driven quality strategy for improving processes. DMAIC problem solving is an integral part of every successful company's Lean-Six Initiative.

3. 6-S Workplace Organization – Thursday, May 16

You will gain an understanding of the Lean 6-S workplace organization system used to reduce waste and optimize productivity through maintaining an orderly workplace and using visual cues to achieve more consistent operational results.

4. Root Cause & Corrective Action – Thursday, May 23

You will learn the RCCA systematic approach to identifying a root cause and how to implement permanent corrective actions to prevent the problem from ever happening again.

**Four full-days of Expert Instruction
plus Certification for \$2,150**
